Operations Research Letters 16 (1994) 303–304

operations research letters

Author Index to Volume 16

The issue number is given in front of the page numbers

Aarssen, K. and N.M. van Dijk, A note on Jackson networks with state-dependent rejection probabilities (3) 177–182
Adams, W.P., *see* Lougee-Heimer, R. (3) 139–148
Anily, S. and G. Mosheiov, The traveling salesman problem with delivery and backhauls1 (1) 11– 18
Averbakh, I. and O. Berman, Categorized bottleneck–minisum path problems on networks (5) 291–297
Bar-Lev, S.K., M. Parlar and D. Perry, On the EOQ model with inventory-level-dependent demand rate and random yield (3) 167–176
Berman, O., *see* Averbakh, I. (5) 291–297
Boese, K.D., A.B. Kahng and S. Muddu, A new adaptive multi-start technique for combinatorial global optimizations (2) 101–113
Chae, K.C. and T.S. Kim, Reversed absorbing Markov chain: A sample path approach (1) 41– 46
Chaudhuri, P., Finding maximum matching for bipartite graphs in parallel (1) 47– 49
Chen, H.-D., P.M. Pardalos and M.A. Saunders, The simplex algorithm with a new primal and dual pivot rule (3) 121–128
Chen, B., A. van Vliet and G.J. Woeginger, New lower and upper bounds for on-line scheduling (4) 221–230
Choi, I.-C., *see* Kim, S.-I. (4) 231–239
Falin, G., *see* Khalil, Z. (5) 285–290
Federgruen, A. and G. Mosheiov, Greedy heuristics for single-machine scheduling problems with general earliness and tardiness costs (4) 199–208
Fishman, G.S., Choosing sample path length and number of sample paths when starting in steady state (4) 209–219
Ghosh, J.B., Batch scheduling to minimize total completion time (5) 271–275
Goemans, M.X. and D.P. Williamson, Approximating minimum-cost graph problems with spanning tree edges (4) 183–189
Hochbaum, D.S. and D. Landy, Scheduling with batching: Minimizing the weighted number of tardy jobs (2) 79– 86
Hoogeveen, J.A., J.K. Lenstra and B. Veltman, Three, four, five, six, or the complexity of scheduling with communication delays (3) 129–138
Jan, R.-H., *see* Liang, D.-R. (1) 51– 59
Józefowska, J., B. Jurisch and W. Kubiak, Scheduling shops to minimize the weighted number of late jobs (5) 277–283
Jurisch, B., *see* Józefowska, J. (5) 277–283
Kahng, A.B., *see* Boese, K.D. (2) 101–113
Kalpakam, S. and K.P. Sapna, Continuous review (s, S) inventory system with random lifetimes and positive leadtimes (2) 115–119
Khalil, Z. and G. Falin, Stochastic inequalities for M/G/1 retrial queues (5) 285–290
Kim, S.-I. and I.-C. Choi, A simple variational problem for a moving vehicle (4) 231–239
Kim, T.S., *see* Chae, K.C. (1) 41– 46
Kubiak, W., *see* Józefowska, J. (5) 277–283
Landy, D., *see* Hochbaum, D.S. (2) 79– 86

Elsevier Science B.V.

Lee, C.-Y. and G.L. Vairaktarakis, Minimizing makespan in hybrid flowshops (3) 149–158
Lenstra, J.K., *see* Hoogeveen, J.A. (3) 129–138
Liang, D.-R. and R.-H. Jan, Reliability analysis of a simple replicated and-fork/and-join graph (1) 51– 59
Llewellyn, D.C., *see* Wikum, E.D. (2) 87– 99
Lougee-Heimer, R., W.P. Adams and D.R. Shier, Some applications of nonnegative linear systems: Farkas strikes again (3) 139–148
Madsen, K., H.B. Nielsen and M.Ç. Pınar, New characterizations of ℓ_1 solutions to overdetermined systems of linear equations (3) 159–166
Makimoto, N., I. Nakagawa and A. Tamura, An efficient algorithm for finding the minimum norm point in the convex hull of a finite point set in the plane (1) 33– 40
Melman, A., A new linesearch method for quadratically constrained convex programming (2) 67– 77
Mizuno, S., A predictor–corrector infeasible-interior-point algorithm for linear programming (2) 61– 66
Mosheiov, G., *see* Anily, S. (1) 11– 18
Mosheiov, G., *see* Federgruen, A. (4) 199–208
Muddu, S., *see* Boese, K.D. (2) 101–113
Nakagawa, I., *see* Makimoto, N. (1) 33– 40
Nemhauser, G.L., *see* Wikum, E.D. (2) 87– 99
Nemhauser, G.L. and P.H. Vance, Lifted cover facets of the 0–1 knapsack polytope with GUB constraints (5) 255–263
Nielsen, H.B., *see* Madsen, K. (3) 159–166
Pardalos, P.M., *see* Chen, H.-D. (2) 121–128
Parlar, M., *see* Bar-Lev, S.K. (3) 167–176
Patriksson, M., On the convergence of descent methods for monotone variational inequalities (5) 265–269
Pearn, W.L., Solvable cases of the k-person Chinese postman problem (4) 241–244
Perry, D., *see* Bar-Lev, S.K. (3) 167–176
Pferschy, U., R. Rudolf and G.J. Woeginger, Monge matrices make maximization manageable (5) 245–254
Pınar, M.Ç., *see* Madsen, K. (3) 159–166
Poljak, S. and Zs. Tuza, The expected relative error of the polyhedral approximation of the max-cut problem (4) 191–198
Rhee, W.T., On the fluctuations of simple matching (1) 27– 32
Rhee, W.T., Boundary effects in the traveling salesperson problem (1) 19– 25
Rudolf, R., *see* Pferschy, U. (5) 245–254
Sapna, K.P., *see* Kalpakam, S. (2) 115–119
Saunders, M.A., *see* Chen, H.-D. (2) 121–128
Schmeiser, B.W. and M.R. Taaffe, Time-dependent queueing network approximations as simulation external control variates (1) 1– 9
Shier, D.R., *see* Lougee-Heimer, R. (2) 139–148
Taaffe, M.R., *see* Schmeiser, B.W. (1) 1– 9
Tamura, A., *see* Makimoto, N. (1) 33– 40
Tuza, Zs., *see* Poljak, S. (4) 191–198
Vairaktarakis, G.L., *see* Lee, C.-Y. (3) 149–158
van Vliet, A., *see* Chen, B. (4) 221–230
van Dijk, N.M., *see* Aarssen, K. (3) 177–182
Vance, P.H., *see* Nemhauser, G.L. (5) 255–263
Veltman, B., *see* Hoogeveen, J.A. (3) 129–138
Wikum, E.D., D.C. Llewellyn and G.L. Nemhauser, One-machine generalized precedence constrained scheduling problems (2) 87– 99
Williamson, D.P., *see* Goemans, M.X. (4) 183–189
Woeginger, G.J., *see* Chen, B. (4) 221–230
Woeginger, G.J., *see* Pferschy, U. (5) 245–254
